EXECUTIVE SUMMARY

AI/ML Engineer skilled in building scalable Gen AI and deep learning solutions. Computer Science graduate with expertise in Python, LangChain, RAG, TensorFlow, and SQL. Experienced in engineering intelligent applications, including a live Gen AI platform and a medical diagnosis system. Published peer-reviewed researcher (IJRASET, 2025) with a 92%-accuracy deep learning model.

TECHNICAL SKILLS

Programming Languages: Python, SQL
AI / ML & Deep Learning: Scikit-learn, TensorFlow, Keras, CNN, Deep Learning, Model Tuning
NLP & Generative AI: LangChain, RAG, OpenAI APIs, Prompt Engineering, NER, Text Classification, TF-IDF
Data & Databases: Pandas, NumPy, EDA, Feature Engineering, MySQL, PostgreSQL, SQLAlchemy ORM
Cloud & DevOps: AWS SageMaker (concepts), Git, GitHub, Jira, Agile/Scrum
Frameworks & Visualization: Flask, Streamlit, REST APIs, Power BI, Matplotlib, Seaborn

EXPERIENCE

Qspiders Software Testing & Solutions

Python Developer Intern (Onsite) | Nov 2025 - May 2026 | Bengaluru, Karnataka

- Engineered reproducible ETL pipelines using Python, Pandas, and SQLAlchemy ORM for efficient data collection and transformation.
- Cleaned and processed large-scale, multi-source datasets, cutting manual data-handling effort by ~40%.
- Performed EDA and statistical analysis to uncover actionable business insights; built Power BI dashboards for stakeholders.
- Maintained Git repositories, authored technical documentation, and managed Agile/Scrum sprints via Jira.

PROJECTS

AI Resume Intelligence Engine

Python, LangChain, RAG, OpenAI APIs, Streamlit | Nov 2025 - Dec 2025

- Built an end-to-end Gen AI application using LangChain and RAG for intelligent document retrieval and semantic search.
- Implemented TF-IDF vectorization and OpenAI LLM APIs for context-aware resume analysis; validated across 100+ test cases.
- Deployed live on Streamlit Cloud with full architecture documentation and runbooks.

Skin Cancer Detection Portal

HTML, CSS, JavaScript, MySQL, TensorFlow | Jan 2025 - May 2025

- Achieved 92% model accuracy in early-stage skin cancer detection; reduced false positives by 15%.
- Optimized MySQL queries for patient record management, improving data retrieval time by 35%.

ACHIEVEMENTS & EDUCATION

Research Publication (IJRASET, March 2025)

Published and presented "Doctor-Patient Portal with Skin Cancer Prediction Using Deep Learning" at an International Conference on Recent Trends in Computing & Communication Technologies.

Smart India Hackathon (Sep 2023) - Adhiyamaan College of Engineering

Developed a prototype solution focusing on problem-solving and application development.

Adhiyamaan College of Engineering, Hosur, Tamil Nadu

B.E. Computer Science and Engineering | CGPA: 7.0/10 | Sep 2021 - May 2025
